The grading system of studying results	
The system of assessment of the formed competencies takes into account the types of classes, which include lectures, seminars, practical classes, as well as independent work. Assessment of the formed competencies of students is carried out according to the accumulative 100-point system. The current control carried out during the semester during practical (seminar) classes and independent work is assessed by the sum of points scored.	

The maximum possible number of points for the current and final control during the semester - 100 and the minimum possible number of points - 60.

Current control includes the following control measures: tasks by topics; current control works; presentations on topics and essay writing.

More detailed information on the assessment and accumulation of points in the discipline is given in the work plan (tech.map) of the discipline.

The policy of discipline

The teaching of the discipline is based on the principles of academic integrity. Violations of academic integrity are: academic plagiarism, fabrication, falsification, write-off, deception, bribery, biased evaluation. For violation of academic integrity, students are brought to the following academic responsibility: re-assessment of the relevant type of educational work

Further information about competencies, learning results, methods of study, forms of study, independent students' work are outlined in Study programme of the discipline

Syllabus approved at the meeting of Department «28» 08. 2022. Protocol №1
