**Course page on the Moodle platform  
(personal training system)**

**Assessment system of learning outcomes**

The system of assessment of formed competences takes into account the types of classes, which include lectures, practical classes, as well as the performance of self-study work. The assessment of the formed competencies of students is carried out by the cumulative 100–point system. The final control, which is carried out during the semester during the practical, laboratory classes and self-study work is evaluated by the sum of the points scored. The maximum possible number of points for the final and summative control during the semester – 100 and the minimum possible number of points – 60.

Final control includes the following controls: assignments for the topics; flow control works; presentations on topics.

More detailed information about the evaluation and accumulation of points in the academic disciplines is given in the work plan (technology chart) in the academic disciplines.

**Discipline policies**

*The study of the discipline is based on the principles of academic integrity. The following shall be considered violations of academic integrity: academic plagiarism, fabrication, falsification, misrepresentation, deception, fraud, negligence, and biased assessment. For breach of academic integrity, education graduates will be held academically liable for the following: re-passing the assessment of the appropriate type of educational work*

***More detailed information on competencies, study outcome, study methods, forms of assessment, self-study can be found in the Work Programme of the discipline***

Syllabus approved at the meeting of the Department «*Management, Logistics and Innovations*».
