

Syllabus of the educational discipline
«Logistics»

Specialty	<i>073 Management</i>
Educational program	<i>Logistics</i>
Level of education	<i>First high education degree (bachelor)</i>
Discipline status	<i>mandatory</i>
Teaching language	<i>English</i>
Course / semester	<i>2 course, 4 semester</i>
Number of ECTS credits	<i>5</i>
Distribution by types of classes and hours of study	<i>Lectures - 24 hours. Laboratory works - 12 hours. Practical classes - 12 hours. Independent training - 102 hours.</i>
Form of final control	<i>Exam</i>
Department	<i>Department of Management, Logistics and Innovation, Kharkiv , 9A Nauki Ave., main educational building, 2th floor, office 225, phone number:, +380577020265 ,http://www.eeml.hneu.edu.ua/</i>
Teacher (s)	<i>Kolodizieva Tetiana Olexandrivna, Associate Professor of Department of Management, Logistics and Innovation , Associate Professor</i>
Teacher's contacts	<i>kolodizeva @ ukr.net</i>
Days of the classes	<i>Lectures: according to the actual schedule Practical classes and laboratory works: according to the actual schedule</i>
Consultations	<i>According to the schedule, online, by request, individual</i>
<i>The goal of the discipline is formation of modern theoretical knowledge and practical skills for using principles and techniques of logistics in the general system of the company management</i>	
Prerequisites for learning <i>"Higher Mathematics" , "Macro and Microeconomics" , "Commodity market infrastructure, commodity research" , "Enterprise Economics" , "Management"</i>	
The content of the discipline Content module 1. Conceptual foundations of logistics Theme 1. Logistics – an instrument of the market economy Theme 2. The concept and methodology of the integrated logistics Theme 3. The objects of the logistics management and logistics operations Theme 4. Logistics activity and logistics functions Theme 5. Logistics management in the general management Content module 2. Functional and basic logistics sharing Theme 6. Logistics approach to management of material flows in manufacturing Theme 7. Logistics approach to management of material flows in circulation Theme 8. Logistics approach to customer service Theme 9. Warehouse and transportation in logistics Theme 10. Economic support of logistics	
Material and technical support (software) of the discipline <i>multimedia equipment</i>	
Course page on the Moodle platform (personal training system)	<i>https://pns.hneu.edu.ua/</i>

Learning outcomes assessment system

The system of assessment of the formed competencies in students takes into account the types of classes, which according to the curriculum of the discipline include lectures and laboratory/practical lessons. Assessment of the formed competencies of students is carried out according to the accumulative 100-point system. In accordance with the Provisional Regulation "On the procedure for evaluating the learning outcomes of students according to the accumulative point-rating system" Simon Kuznets KhNEU, control measures include:

current control, which is carried out during the semester lectures, laboratory/practical lessons is estimated by the amount of points scored (maximum score - 60 points; the minimum score that allows a student to take the exam - 35 points);

modular control, which is carried out taking into account the current control for the relevant content module and aims at an integrated assessment of student learning outcomes after studying the material from the logically completed part of the discipline - the content module;

final / semester control, which is conducted in the form of a semester exam (maximum score - 40 points; minimum score - 25 points), according to the schedule of the educational process.

More detailed information on assessment is given in the technological map of the discipline.

Discipline policies

Policy of observance of academic integrity: independent performance of educational tasks, tasks of current and final control of learning outcomes; references to sources of information in the case of statements.

Attendance policy: active student work during lectures and practical classes are evaluated in 1 point; absence from class makes it impossible to obtain the appropriate points. If a student misses a lecture, he / she must complete it (answer the tests). Missed practical tasks are performed and defended by the student according to the consultation schedule. The current "unsatisfactory", which the student receives, are retaken before the final control with a mandatory mark in the journal of academic groups.

Policy for the performance of tasks later than the deadline: performance and defend tasks in the discipline take place according to the work plan (technological map).

If there is a significant deviation from the deadlines for the tasks, a coefficient of 0.8 is applied to the evaluation results.

More detailed information about competencies, learning outcomes, teaching methods, assessment forms, independent training is given in the Syllabus (working plan) of the educational discipline
