Course page on the Moodle platform (personal training system)	<i>Lectures, presentations, teach Ini films , practical tasks, tests, materials for self-study and current, final control subjects. https://pns.hneu.edu.ua/</i>
Learning outcomes assessment system	
<i>The system of assessment of the formed competencies in students takes into account the types of classes, which according to the curriculum of the discipline include lectures, laboratory classes and independent work. Assessment of the formed competencies of students is carried out according to the accumulative 100-point system. In accordance with the Provisional Regulation "On the procedure for evaluating the learning outcomes of students according to the accumulative point-rating system "</i>	

KhNEU. S. Kuznets, control measures include:

current control, which is carried out during the semester during lectures, laboratory classes and is estimated by the amount of points scored (maximum amount - 60 points; the minimum amount of doses that allows a student to take the exam - 35 points);

modular control, which is carried out taking into account the current control for the relevant content module and aims at an integrated assessment of student learning outcomes after studying the material from the logically completed part of the discipline - the content module;

final / semester control role, which is carried out in the form of current and final control in accordance with the schedule of the educational process.

More detailed information on assessment is given in the technological map of the discipline.

Discipline policies

Policy of observance of academic integrity: independent performance of educational tasks, tasks of current and final control of learning outcomes; references to sources of information in the case of statements.

Attendance policy: active student work during lectures and practical classes are estimated at 1 point; absence from class makes it impossible for a student to receive the appropriate points. The lecture is skipped by the student (answers the tests). The student performs and defends the missed practical tasks according to the schedule of consultations. The current "unsatisfactory", which the student receives, are transferred to the teacher before the final control with a mandatory mark in the journal of academic groups.

Policy for the performance of tasks later than the deadline: implementation and protection tasks in the discipline take place according to the work plan (technological map).

If there is a significant deviation from the deadlines for the tasks, a coefficient of 0.8 is applied to the evaluation results.

More detailed information on competencies, learning outcomes, teaching methods, forms of assessment, independent work is given in the Work program of the discipline

The syllabus was approved at the meeting of the department "01 " on July 2022. Minutes
