

Syllabus of the course «Statistics»

Specialty	073 Management
Study Programme	Business Administration
Study cycle (Bachelor, Master, PhD)	the first (Bachelor) level of higher education
Course status	Mandatory
Language	English
Term	second year, third semester
ECTS credits	5
Workload	Lectures – 24 hours. Laboratory studies – 24 hours. Self-study – 102 hours.
Assessment system	Grading including Exam
Department	Statistics and economic forecasting, room 406 of first corps, phone +38(057)702-18-32, (additional 4-61), department website: https://statistics.hneu.edu.ua/
Teaching staff	Sierova Iryna, PhD of Economics, Associate professor of Statistics and Economic Forecasting Department Rayevneva Olena, Doctor in Economics, Professor of Statistics and Economic Forecasting Department Shlykova Viktoriia, PhD in Economics
Contacts	Sierova I.A.: irina.cevaro@gmail.com Rayevneva Olena O.V.: olena.raev@gmail.com Shlykova V. O.: v.shlykova@ukr.net
Course schedule	Lectures: according to the class schedule Laboratory studies: according to the current schedule
Consultations	At the Department of statistics and economic forecasting, in-person consultations, according to the consultations schedule, individual, chat in PNS
The purpose of the course: to improve theoretical knowledge and applied skills by means of statistical observations, statistical analysis methods and forecasting of social and economic phenomena and processes.	
Prerequisites for learning Higher mathematics, Probability theory and mathematical statistics, Informatics	
Content of the course	
Content module 1. Introduction to statistics	
Topic 1. Methodological principles of statistics	
Topic 2. Statistical observation	
Topic 3. Presentation of statistical data: tables, graphs, charts, maps	
Topic 4. Statistical data summarization and grouping	
Content module 2. Statistical indicators and distribution series	
Topic 5. Statistical indicators	
Topic 6. Analysis of distribution series	
Topic 7. Sampling and sampling distributions	
Topic 8. Analysis of the concentration, differentiation and similarity of distributions.	
Content module 3. Methods of analysing the interconnections of phenomena and processes	
Topic 9. Statistical methods of measuring interrelations	
Topic 10. Analysis of the dynamics intensity	

Topic 11. Analysis of development trends and fluctuations

Topic 12. Index method

Teaching environment (software)

Multimedia projector, S. Kuznets PNS, Corporate Zoom system

Assessment system

Assessment of students' learning outcomes is carried out by the University according to the cumulative 100-point system.

Current control is carried out during lectures and laboratory classes and aims to assess the level of students' readiness to perform particular tasks, and is assessed by the amount of scored points.

The maximum amount during the semester – 60 points; the minimum amount required is 35 points. Final control is carried out at the end of the semester in the form of an exam (the maximum amount is 40 points, the minimum amount required is 25 points).

Current control includes the following assessment methods: laboratory work; essay in the form of a presentation; homework in the form of a case study; test control; written control works.

More detailed information on assessment and grading system is given in the technological card of the course.

Course policies

Teaching of the course is based on the principles of academic integrity.

Violation of academic integrity includes academic plagiarism, fabrication, falsification, cheating, deception, bribery, and biased assessment.

Students may be brought to the following academic responsibility for breach of academic integrity: repeated assessment of the corresponding type of learning activity.

More detailed information about competencies, learning outcomes, teaching methods, assessment forms, self-study is given in the Program of the course.
