Learning forms and methods

Assessment of the formed competencies of students is carried out according to the accumulative 100-point system.

The current control, which is carried out during the semester during practical (seminar) classes and independent work, is assessed by the sum of points scored. The goal is to check the level of preparedness of a student to perform specific tasks.

The final control includes the semester control, which is carried out in the form of pass.

The maximum possible number of points for the current and final control during the semester – 100, and the minimum possible number of points – 60.

Current control includes the following control measures: tasks by topics; current control works; presentations on topics; and writing essay.

More detailed information on the system of evaluation and accumulation of points for the academic discipline is provided in the Working plan for the academic discipline.

Policies of the academic discipline

The teaching of the discipline is based on the principles of academic integrity. Violations of academic integrity include academic plagiarism, fabrication, falsification, write-off, deception, bribery, and biased evaluation. For violation of academic integrity, students are brought to the following academic responsibility: re-assessment of the relevant type of educational work

More detailed information on competencies, learning outcomes, teaching methods, forms of assessment, independent training are given in the Syllabus of the academic discipline.
