Teaching environment (software)

Multimedia projector, S. Kuznets PNS, Corporate Zoom system, software: MS Excel

Assessment system

The university uses a 100-point cumulative assessment system for evaluating the learning outcomes of higher education students.

Current control is carried out during lectures, practical and laboratory classes to check the level of preparedness of the student for specific tasks and is evaluated by the total number of points, which should range from 35 to 60 points for admission to the exam. The semester control form is an exam, which is graded from 25 to 40 points: the maximum score for the discipline as a whole is 100 points; the minimum score is 60 points.

The final grade for the course is determined by summing up the points for current and semester control in the form of an exam.

The following control measures are used during the teaching of the course.

Current control: competency-oriented individual tasks, presentation, four written test.

More detailed information on assessment and grading system is given in the technological card of the course.

Course policies

Teaching of the academic discipline is based on the principles of academic integrity.

Violation of academic integrity includes academic plagiarism, fabrication, falsification, cheating, deception, bribery, and biased assessment.

Education seekers may be brought to the following academic responsibility for breach of academic integrity: repeated assessment of the corresponding type of learning activity.

More detailed information about competencies, learning outcomes, teaching methods, assessment forms, self-study is given in the Course program
