

# **Syllabus of the course** *«Higher Mathematics»*

Specialty	D5 Marketing	
Study Programme	D5.010 Marketing	
Study cycle (Bachelor, Master, PhD)	the first (Bachelor) level of higher education	
Course status	mandatory	
Language	English	
Term	first year, first semester	
ECTS credits	5	
Workload	Lectures – 16 hours.	
	Practical studies – 16 hours.	
	Laboratory studies – 16 hours.	
	Self-study – 102 hours.	
Assessment system	Grading including Exam	
Department	Department of Economic and Mathematical Modelling, auditorium 329 of the main building phone: (057)702-04-05 (add. 3-33)	
Tl:	website: http://www.vm.hneu.edu.ua/	
Teaching staff	Ievgeniia Iuriivna Misiura, PhD in Technics, Associate professor	
Contacts	Ie. Iu. Misiura ievgeniia.misiura@hneu.net	
Course schedule	Lectures: according to the schedule Practical studies: according to the schedule Laboratory studies: according to the schedule	
Consultations	At the Department of Economic and Mathematical Modelling offline, according to the schedule, individual, PNS chat.	

#### Learning objectives and skills:

form future specialists' mathematical knowledge for solving theoretical and practical economic problems in marketing, master skills in analytical thinking and skills in using mathematical knowledge for formation of real processes and developments and for solving economic problems

Structural and logical scheme of the course

1	Structural wind 10green structure of the townst		
	Prerequisites	Postrequisites	
	School course of mathematics	Probability Theory and Mathematical Statistics	
	(geometry, algebra and precalculus)		
		Informatics	

## **Course content**

**Module 1:** *Linear algebra and analytical geometry* 

Topic 1. The elements of the theory of matrices and determinants

Topic 2. The general theory of the system of linear algebraic equations

Topic 3. The elements of vector algebra. Elements of analytical geometry

**Module 2:** The elements of mathematical analysis

Topic 4. The limit of a function and continuity. Differential calculus of the function of one variable

**Topic 5. Analysis of the function of several variables** 

Topic 6. Integral calculus

**Topic 7. Differential equations** 

Topic 8. Series

#### **Teaching environment (software)**

Multimedia projector, S. Kuznets PNS, Corporate Zoom system, software: MatLab, Octave

### Simon Kuznets Kharkiv National University of Economics

#### **Assessment system**

Assessment of students' learning outcomes is carried out by the University according to the cumulative 100-point system.

Current control is carried out during lectures and practical (seminar) classes and aims to assess the level of students' readiness to perform particular tasks, and is assessed by the amount of scored points.

The maximum amount during the semester -60 points; the minimum amount required is 35 points. Final control is carried out at the end of the semester in the form of an exam (the maximum amount is 40 points, the minimum amount required is 25 points).

Current control includes the following assessment methods: homework; defence of laboratory works; a written test; an independent creative work, a colloquium.

More detailed information on assessment and grading system is given in the technological card of the course.

# **Course policies**

Teaching of the academic discipline is based on the principles of academic integrity.

Violation of academic integrity includes academic plagiarism, fabrication, falsification, cheating, deception, bribery, and biased assessment.

Education seekers may be brought to the following academic responsibility for breach of academic integrity: repeated assessment of the corresponding type of learning activity.

More detailed information about competencies, learning outcomes, teaching methods, assessment forms, self-study is given in the Course program
