each discipline includes current, modular (determined in accordance with the Content module), and final evaluation of knowledge. Current control is carried out during the semester on lectures and laboratory sessions and estimated amount of points. Modular control is carried out on the basis of current control of the relevant module contents and aims at an integrated assessment of students' knowledge after studying the logically completed part of the discipline – the content module. Modular control is carried out in the form of a comprehensive reference work for the same content modules. The intermediate test control is conducted at the end of each topic of the discipline. Conducting this test involves identifying students' mastery of the lecture material of the module and the ability to apply it to solve practical situations. This may include a test containing questions on the theoretical material and a small practical problem. Final control of knowledge and competencies of students in the discipline is carried out on the basis of the exam.

The final grade for the discipline is calculated as the sum of points obtained during the current control of the accumulative system. A student should be considered certified if the sum of points obtained from the final / semester test is equal to or exceeds 60. The minimum possible number of points for the current and modular control during the semester - 35 and the minimum possible number of points scored in the exam - 25 The result of the semester exam is evaluated in points (maximum number - 40 points, minimum number of credits - 25 points)
